

Sergey Stepantsov is an experimental nuclear physicist. After graduation from the Moscow Engineering and Physics Institute (MEPhI) in 1978 till now he has been working, nowadays as a senior researcher, in the Flerov Laboratory of Nuclear Reactions, JINR. The area of his interest is designing ion-optical systems for carrying out investigations in nuclear physics with radioactive as well as stable beams. In 1993 he defended his PhD thesis on this theme.
