## THERAPY

### 38 New Light on Medicine

BY NICK LANE

Light-activated toxins can fight cancer, blindness and heart disease. They may also explain legends about vampires.

38 Light-activated therapies

## INFORMATION TECHNOLOGY

### 46 The Nanodrive Project

BY PETER VETTIGER AND GERD BINNIG

Inventing the first nanotechnological data storage device for mass production and consumer use is a gigantic undertaking.

## PALEOANTHROPOLOGY

### 54 An Ancestor to Call Our Own

BY KATE WONG

Is a seven-million-year-old creature from Chad the oldest member of the human lineage? Can we ever really know?

## NUTRITION

### 64 Rebuilding the Food Pyramid

BY WALTER C. WILLETT AND MEIR J. STAMPFER

The simplistic dietary guide introduced years ago obscures the truth that some fats are healthful and many carbohydrates are not.

## GEOLOGY

### 72 Earthquake Conversations

BY ROSS S. STEIN

Contrary to expectations, large earthquakes can interact with nearby faults. Knowledge of this fact could help pinpoint future shocks.

## PHYSICS

### 80 The Science of Bubbly

BY GÉRARD LIGER-BELAIR

A deliciously complex physics governs the sparkle and pop of effervescence in champagne.

## departments

**8 SA Perspectives**

A baby step for the cyborgs.

**10 How to Contact Us****10 On the Web****12 Letters****16 50, 100 & 150 Years Ago****18 News Scan**

- Little FDA interest in an implantable chip.
- NASA looks again, reluctantly, to the moon.
- Micromarketing to food-allergy sufferers.
- A loophole in the four-color theorem.
- Refractive fracas over the speed of light.
- Vibrating shoes improve balance.
- By the Numbers: Heating the U.S. home.
- Data Points: Nurses needed, stat!

**32 Innovations**

Canesta's virtual keyboard is one of the first examples of a new type of remote control.

**34 Staking Claims**

Entertainment companies seeking to prevent digital theft head for a showdown with fair-use advocates.

**36 Profile: Jeffrey D. Sachs**

The Columbia University economist is bullish on what science can do to help the developing world.

**86 Working Knowledge**

Ballistic fingerprinting.

**88 Voyages**

Flying over an active volcano.

**90 Reviews***Water Follies* describes the coming crisis in freshwater availability.

## columns

**35 Skeptic** BY MICHAEL SHERMER

Is the universe fine-tuned for life?

**93 Puzzling Adventures** BY DENNIS E. SHASHA

Timing with proteins.

**94 Anti Gravity** BY STEVE MIRSKY

Fictional fellowships.

**95 Ask the Experts**How do search engines work?  
What is quicksand?**96 Fuzzy Logic** BY ROZ CHAST
